ShopSmart Retail Analysis

WEEK 1 PROJECT SUMMARY

Project Overview

This project was completed as part of the AnalystLab Africa Internship Programme, Week 1. It focuses on analyzing ShopSmart retail data to understand business performance and support better decision-making.

Work Completed

- Reviewed the available datasets.
- Identified primary keys and relationships between datasets.
- Worked on data cleaning.
- Used lookup functions in Excel.
- Analyzed business questions relating to products, stores, customers, sales, returns, suppliers, and inventory.
- Prepared business recommendations based on the analysis.

Deliverables

- **ShopSmart_Analysis.xlsx** — Excel analysis workbook.
- **Executive_Dashboard.pdf** — Executive dashboard.
- **Business Report.pdf** — Business findings and recommendations.

Conclusion

The project uses retail data analysis to identify business performance patterns, highlight areas for improvement, and recommend actions management can consider.
